Perimeter, Area and Volume Maths Doctor

The area of a triangle = $\frac{1}{2} \times \text{base} \times \text{height}$. The area of a rectangle = $\text{base} \times \text{height}$. The area of a parallelogram = $\text{base} \times \text{height}$. The 'volume' of a shape is the number of cubic units which occupy it, i.e. the amount of 3D space which the shape occupies.

Perimeter, Area, and Volume Varsity Tutors

The volume of a solid 3 D shape is the amount of space displaced by it. Some formulas for common 2 dimensional plane figures and 3 dimensional solids are given below. The answers have one, two, or three dimensions; perimeter is measured in linear units , area is measured in square units , and volume is measured in cubic units .
